Unpacking Machine Learning: A Critical Exploration of AI for K-12 Teachers - Part 1*

- What is AI and how is it changing us?
- How might teachers respond to AI's challenges?
- How can we ethically use AI to support deep creativity and critical thinking in our learners?
- How can we apply critical media literacy frameworks to AI?

As AI plays an increasingly significant role in education, it is important that teachers build their critical understanding of how it works, its potential benefits, as well as the challenges it brings to teachers and learners. We'll discuss how AI can support creative and critical exploration, and make connections to AML's critical frameworks for analysis and teaching. Our webinar guest will be Moses Velasco, OTF Director for Curriculum and Assessment; click [here](#) for his CV.

***Part 2** in early 2025 will explore practical classroom resources and strategies.

Date: Thursday December 5, 2024

Time: 4:30-6:00 PM ET

Where: online PD webinar

Cost: free

Registration: Click [here](#) to register.
