

## Package Design Evaluation

What product did you choose? \_\_\_\_\_

**6 outside design panels are created using available computer software (Adobe Photoshop)**  
and demonstrate learned knowledge and skills

STUDENT: \_\_\_\_\_

/25

- Work demonstrates strong computer software skills
- Your design file was named properly
- Designs were flattened and saved as .jpg files before submitting them
- All panels are created the correct size for the package (proving correct use of rulers in software program and providing extra space on all sides of the white page for printing requirements)
- Work demonstrates strong sense of colour and use of imagery
- Composition is organized (alignment, sizing of different text, placement of elements)
- Panel designs help convey important information
- Information is spread out logically and all important information is easy to find
- Panel designs demonstrate understanding of marketing appeals (slogans, etc.)
- Product was interpreted well; package design and name suits the product chosen by the student
- Product name appears prominently on the package and is seen several times
- All work done on the design is originally produced
- No spelling, grammar, or punctuation mistakes
