

## There's Ought to be a Sign for That!

Our lives are filled with signs on roads, buildings, statues & in stores, restaurants, offices and parks.

These signs can warn people, help them decide, give them information or advice, make them laugh, even save their lives.

But there are also places and situations that need signs that no one has thought of or designed---**until today**.

**Imagine** a new sign that is needed in Toronto.

Your sign might be an icon (like a 'No U-turn' sign),

a word or several words, or a combination of words and icons.

**Design** your sign.

Write a 3 – 5 sentence paragraph that explains the meanings and importance of your sign and where it should be posted.

Your sign might save lives, improve lives, or just be funny.
