The Association for Media Literacy
presents:

Unpacking Machine Learning:
Generative AI in the 1-12 Classroom - Part 2

- How might teachers respond effectively to AI's challenges?
- How can we ethically use Generative AI to support deep creativity and critical thinking in our learners?
- How can we apply critical media literacy frameworks to teaching through and about Generative AI?

As AI plays an increasingly significant role in education, it is important that teachers build their critical understanding of its potential for learning, as well as the challenges it brings to teachers and learners. We'll share and discuss a broad range of classroom examples of how AI can support creative and critical exploration, and make connections to AML's critical frameworks for analysis and teaching. Our webinar guest will be Heidi Siwak, an experienced Ontario educator in the field of learning through critical inquiry and presently a Teacher-Coach for I-Think.

Date: Thursday, February 20, 2025
Time: 4:30–6:00 PM ET
